SPECIAL OFFERS

SPRING 2010

P&R Labpak Ltd would like to announce the development of a stronger alliance between ourselves and Purite Limited, one of the leading manufacturers of water purification equipment.

Purite specialises in the design, development and manufacture of advanced, high performance laboratory water purification systems.

Together with Purite, P&R Labpak are now in a position to offer water purification instrumentation designed to meet the needs of specific applications, providing high levels of water quality, consistency and reliability using a wide range of advanced technologies.

There are four main models to choose from:-

- Select Descale
- Select Analyst
- Select HP
- Select Bio

All have innovative colour touchscreen panels with intuitive menus.

The Benefits of Purite

Purite instruments use a range of technologies—reverse osmosis, irradiation, filtration and ion-exchange and to be introduced later in 2010—Electro Deionisation (EDI).

All units are easy to use and simple to maintain. EDI would mean less maintenance and less consumables with cartridges being easy to change. Purite units are reliable, using proven technology to ensure a consistent supply of purified water. The units are quick to install and configure and offer great flexibility with space saving designs.

Purite also specialise in designing, installing & commissioning full ring main water supplies

Units are easy to service and maintenance programmes can be tailored to match requirements.

Water qualities comply with the BSEN ISO3696 and ASTM D1193-06 industry standards.
